## SUMMARY

Frontend-led full-stack engineer (MS Computer Engineering, ASU — GPA 3.81, May 2026) shipping production spend-management software with deep React + TypeScript craft. Built and runs Trezzit (app.trezzit.com), a bill-splitting and expense-reconciliation SaaS serving **600+ users** for 12+ months — React 19 PWA with **341 components, 14 contexts (no Redux), 995 backend tests**, GSAP + Framer Motion animations, and iOS Safari-compatible mobile UX. Portfolio of shipped artifacts, not side projects — Intel **PR #655** merged upstream into their official self-checkout reference architecture.

## TECHNICAL SKILLS

**Frontend & TypeScript:** React 19 | TypeScript | Next.js | Material-UI v6 | Tailwind CSS | GSAP (ScrollTrigger) | Framer Motion | Recharts | react-force-graph | React Router v7 | PWA (Service Worker, VAPID Push, Share Target API) | iOS Safari Compat | Web Performance | Component Architecture | React Context (no Redux)

**Backend Systems & Data:** Python | Django REST Framework | FastAPI | Node.js | PostgreSQL | Redis (caching + rate limiting) | Celery (async background jobs) | Cookie JWT + OAuth + OTP | REST API Design | Optimistic Locking

**Cloud & DevOps:** AWS | DigitalOcean | Vercel | Supabase | Docker | Nginx | systemd | GitHub Actions CI/CD | Linux | Git | Multi-provider LLM APIs (Gemini / OpenAI / Claude)

## PROJECT EXPERIENCE

### Trezzit — Production Fintech-Adjacent React SaaS, Sole Engineer (app.trezzit.com) Feb 2025 – Present

- Solo-shipped Trezzit (app.trezzit.com), a bill-splitting and expense-reconciliation SaaS serving **600+ users** for 12+ months — React 19 PWA with **341 components, 14 contexts (no Redux), 8 custom hooks**, Material-UI v6 + Tailwind; GSAP-animated landing page with interactive receipt and split demos, Framer Motion transitions, React Router v7.
- Optimized for mobile-first usability: full PWA with service worker, VAPID push notifications, Share Target API, and iOS Safari compatibility (safe areas, swipe gestures, auto-zoom fixes); Recharts + react-force-graph debt-network visualizations; cookie JWT with auto-refresh + failed-request queuing, Google OAuth, email OTP.
- Backend: Django 5.1 + DRF with **60+ REST endpoints, 40 DB models, 995 tests**; PostgreSQL (Supabase), Redis (caching + rate limits), Celery + Celery Beat for async jobs; built a two-stage AI receipt pipeline routing across Gemini / OpenAI / Claude / Grok — iterated parsing accuracy from **~60% → 95%+**; pre-computed balance system with O(1) reads, zero-sum invariant enforcement, optimistic locking on bills.

### SiliconCrew — Next.js + TypeScript Streaming UI for an LLM Agent Nov 2025 – Present

- Built the Next.js 14 + TypeScript front-end for a 21-tool LLM agent — resizable 3-panel layout (Sidebar | Chat | Artifacts), Monaco code editor, 6 artifact tabs, **WebSocket-streamed tool-call cards** rendering in real time; Zustand state, Tailwind + Radix UI; FastAPI + LangGraph backend with multi-provider LLM routing and full MCP server; achieved **37/92 on CVDP**; public at [github.com/naman-ranka/siliconcrew](https://github.com/naman-ranka/siliconcrew).

### HEAL.AI — AI Billing Assistant with RAG (1st Place, Devlabs Hackathon) Sep – Nov 2025

- Won 1st place at Devlabs Hackathon**; built a custom RAG pipeline (PDF chunking + 768-dim embeddings + cosine-similarity retrieval) enabling natural-language Q&A over uploaded insurance policies, billing overcharge detection, and automated dispute-email generation via Gemini 2.5; FastAPI + Next.js + TypeScript, Dockerized.

## WORK EXPERIENCE

### Software Developer (Sole Engineer) Oct 2022 – Apr 2024 NCR GOLD Bengaluru, India

- Engineered a production Django platform (PostgreSQL + Celery + Nginx on DigitalOcean) processing **18,000+ orders over 3 years**; built 3 role-based portals (admin, artisan, customer) with multi-method auth — automated PDF invoice generation and WhatsApp Business API delivery on every state transition, eliminating **~20 min** of manual relay per order.
- Reverse-engineered third-party Jewely ERP (**zero public API**) through direct SQL schema analysis; built bidirectional bridge model syncing production weights and ERP status in real time; engineered inbound WhatsApp state-machine chatbot (JSON state per user, admin + customer flows) — full accountability loop across all three portals without disrupting legacy system.

## EDUCATION

### Master of Science — Computer Engineering (GPA 3.81/4.0) Expected May 2026 Arizona State University — Coursework: Artificial Intelligence · Foundations of Algorithms · Reinforcement Learning in Robotics · Tempe, AZ Perception in Robotics · Algorithm/Hardware Co-Design

### Bachelor of Engineering — Electrical and Electronics August 2022 BMS College of Engineering Bengaluru, India

## AWARDS & HONORS

- Won **1st place at Devlabs Hackathon** — HEAL.AI, an AI billing assistant with a custom RAG pipeline (768-dim embeddings, cosine-similarity retrieval) for insurance Q&A and automated dispute-email generation.
- Won **'Best Use of AI'** at Strategy X DevHacks'25 (ASU) — built AdaptED AI, a Gemini-powered platform generating personalized flashcards, quizzes, and learning paths from uploaded documents in a 24-hour hackathon.
- Secured **2nd place at Hack SoDA 2024** (Amazon-sponsored, 24-hour) — built PassGen, a secure offline Chrome Extension for unique password generation.
